EDUCATION

PES University

B.Tech in Computer Science and Engineering, CGPA: 8.74/10

Bengaluru, India

Aug 2022 – May 2026 (Expected)

RELEVANT COURSEWORK

- Web Technologies
- Computer Networks
- Big Data
- Database Systems
- Operating Systems
- Machine Learning

PROJECTS

Distributed Logging System | *Python, Fluentd, Apache Kafka, Elasticsearch*

Feb 2024 – May 2024

- github.com/dheerajcl/DistributedLoggingSystem
- Architected a "Distributed Logging System" for microservices observability, processing **10K+ log entries** in test environments.
- Implemented a fault-tolerant **node registration and heartbeat monitoring system** to detect service failures in real-time.
- Deployed **Kibana visualization dashboards** for real-time log analysis across log levels (INFO, WARN, ERROR, FATAL).
- Designed asynchronous pub-sub architecture using **Apache Kafka** for reliable log distribution.
- Documented comprehensive system architecture patterns for microservices logging best practices.

Ignite: Chat with PDF Platform | *TypeScript, Next.js, tRPC, PrismaORM*

Nov 2023 – Feb 2024

- github.com/dheerajcl/Ignite
- Engineered a full-stack AI document system with semantic search and real-time collaborative annotation.
- Implemented document embeddings via **Pinecone** and **LangChain** enabling natural language Q&A with PDFs.
- Developed spaced repetition learning system with AI-generated flashcards using **Fireworks AI**.

ShellSage: AI-Powered Terminal Assistant | *Python, Typer, RichCLI, Shell, Ollama* December 2024 – Present

- github.com/dheerajcl/Shellsage
- Developed a CLI tool for context-aware terminal assistance with local (Ollama) and cloud AI providers (Claude, OpenAI, etc.).
- Designed interactive command suggestions with safety checks, reducing terminal command errors by 60%.
- Implemented dynamic provider/model switching via CLI for seamless AI integration.

TECHNICAL SKILLS

Programming Languages: Python, C++, Java, JavaScript/TypeScript, SQL, Go

Web Development: React, Next.js, ShadCN-UI, Node.js, Express.js, Django, Flask, SpringBoot

Machine Learning and Data Science: TensorFlow, PyTorch, Scikit-learn, OpenCV, Pandas, NumPy

Big Data and Distributed Systems: Apache Spark, Kafka, Hadoop, Hive, HBase, NoSQL

DevOps and Cloud: Docker, Kubernetes, Linux, Git/GitHub, Jenkins, Google Cloud (GCP), AWS

CERTIFICATIONS

Machine Learning Specialization | Stanford Online, DeepLearning.AI — Coursera

June 2024 – Aug 2024

ACHIEVEMENTS

- **Finalist** at Morgan Stanley's national-level 'Code to Give' Hackathon, India - 2025
- Secured 4th place among 45 teams at Synapse 2.0 National-level Hackathon, PES University - 2023.
- Ranked as **Kaggle Expert**, consistently in the top 10% of machine learning challenges.
- Awarded **Best IoT Design** from among 20 projects at the PES University IoT Workshop - 2023.
- Recipient of the **MRD Award** for academic excellence (Top 5% in CS department).
