Computer Science Engineering undergraduate with strong interest in problem-solving and core CS fundamentals

PROFESSIONAL SUMMARY

Computer Science Engineering undergraduate skilled in full-stack web development (React, Node.js, MongoDB) with experience building production-ready applications. Actively seeking software development internships.

KEY PROJECTS

FinBulletin:Financial News & Web Platform | React,Node.js,Express.js,MongoDB Nov 2025 - Jan 2026

- Built a full-stack financial news platform serving dynamic content with role-based access, improving content management efficiency by ~40%
- Implemented RESTful APIs using Node.js and Express.js for efficient data retrieval and content management
- Utilized MongoDB for flexible document-based storage of articles, users, and metadata
- Built a responsive frontend using React, HTML5, and CSS3 for improved user experience across devices
- Followed software engineering best practices including modular design, requirement analysis, and secure coding guidelines (OWASP basics)

Paw Care:Pet Care Web Platform | PHP,MYSQL,HTML,CSS,JavaScript July 2025 - Aug 2025

- Designed and developed a web-based pet care platform connecting pet owners with veterinary services and pet product vendors
- Implemented role-based authentication for users and vendors to enable secure access and personalized dashboards
- Developed product listing and order management modules using PHP and MySQL for efficient service handling
- Collaborated in a team environment to integrate backend logic, database schema, and responsive UI components
- Built backend modules for service listing and order management using PHP, reducing booking processing time by ~30%

EDUCATION

Bachelor of Engineering(B.E.)-Computer Science and Engineering(CSE) | P.E.S. college of Engineering, Mandya
2023 – 2027

Score: CGPA:9.22/10

TECHNICAL SKILLS

Programming Languages: c,c++,java(Basic) • **Web Development:** HTML5,CSS3,JavaScript,PHP • **Computer Science Fundamentals:** Data Structures & Algorithms(Basics),Operating Systems,DBMS,Computer Networks • **Tools & Technologies:** Git & GitHub,VS Code

CORE COMPETENCIES

Problem Solving & Logical Thinking: Solved 100+ Data Structures and Algorithms problems on leetcode,Analyzing problems, applying data structures and algorithms, and implementing efficient solutions • **Software Development Fundamentals:** Understanding of SDLC, debugging, code optimization, and version control practices • **Team Collaboration & Project Work:** Experience working in group projects, coordinating tasks, and contributing to shared codebases using Git

ACTIVITIES & INTERESTS

Academic Projects: Worked on team-based software projects as part of coursework, focusing on design, development, and testing • **Technical Learning:** Actively learning core computer science subjects including Operating Systems, DBMS, and Computer Networks for placements • **interests:** Web application development and backend technologies
